**Classic furniture profiles:** "We tend to control the feeling of a space through accessories and artwork rather than the upholstered furnishings, which we prefer to keep low-key and timeless," Ms. Miller said. "Pieces like the sofa and tufted library chair form a clean-lined backdrop for more exuberant accents like the cast-bronze tree stump coffee table." Added Mr. Carrier, "It's easier to update your décor by replacing accessories, versus a whole suite of furniture." The sofa and library chair are from Dmitriy & Co., one of their go-to sources.
